

Excellence in Action

Expanding Clinical Knowledge

A success story from our Bastrop, LA Team

The team in Bastrop, LA has been participating in this month's Dementia Capable Care Class offered by our Clinical Excellence Department. Our Speech Therapy Team has commented on how much they have learned.

"I have actually used things from the class today in my evaluation this afternoon. I was unaware of all the resources available in JBS. I have used three new tests that are geared more towards lower-level residents. Prior to this training, I would have struggled to create a plan of care for my patient.

Now, I feel confident that I understand how to utilize tools to help meet her where she is and help improve her quality of life."

-Ashley Clarke, SLP

From ACE members to the clinical programs available in JBS, we make sure our team members are equipped with all the tools they need to achieve the outcomes they seek for their residents.

We know from our definition that Clinical Excellence occurs at the intersection of humanity and healthcare. Our Clinical Excellence Department provides a number of classes, resources and programs to help our therapists expand their knowledge and provide the best possible care for our residents. We must never stop learning or growing in order to make that positive difference in the lives of everyone we serve.

Stay tuned for next month's Excellence in Action Story from more of our teams in the field!
